

ATTORNEY GENERAL OF TEXAS  
GREG ABBOTT

September 19, 2014

Ms. Nneka Kanu  
Assistant City Attorney  
City of Houston  
P.O. Box 368  
Houston, Texas 77001-0368

OR2014-16715

Dear Ms. Kanu:

You ask whether certain information is subject to required public disclosure under the Public Information Act (the "Act"), chapter 552 of the Government Code. Your request was assigned ID# 536716 (Houston GC No. 21544).

The Houston Fire Department (the "department") received a request for all Tier Two reports in the department's custody detailing where Tier Two chemicals are stored. You claim the requested information is excepted from disclosure under section 552.101 of the Government Code. We have considered the exception you claim and reviewed the submitted representative sample of information.<sup>1</sup>

We understand the department maintains the requested information through the Tier Two Chemical Reporting Program, a program implemented in accordance with the federal Emergency Planning and Community Right-to-Know Act ("EPCRA") and the Texas right-to-know laws. *See* 42 U.S.C. §§ 11011-11050; Health & Safety Code §§ 505.001-.017, 506.001-.017, 507.001-.013. As explicitly stated in the federal provisions, the EPCRA does not preempt any state or local law. *See* 42 U.S.C. § 11041(a). Thus, we look to the statutory scheme established under Texas law to determine the disposition of the requested information. Facilities subject to Tier Two chemical reporting requirements must report

---

<sup>1</sup>We assume the "representative sample" of records submitted to this office is truly representative of the requested records as a whole. *See* Open Records Decision Nos. 499 (1988), 497 (1988). This open records letter does not reach, and therefore does not authorize the withholding of, any other requested records to the extent that those records contain substantially different types of information than that submitted to this office.

required data concerning Tier Two chemicals to the Department of State Health Services (“DSHS”), the local emergency planning committee, and the local fire chief. Health & Safety Code §§ 505.006(c), (e), 506.006(c)-(d), 507.006(c), (e). It is this information, that is, information filed with the department as part of the Tier Two Chemical Reporting Program, that we address in this ruling. This ruling does not impact the legal right of citizens to access hazardous chemical information directly from a facility for community right-to-know purposes. *Id.* §§ 505.007(a), 506.007(a). Sections 505.007(b) and 506.007(b) require any facility subject to chapter 505 or chapter 506 of the Health and Safety Code to furnish, upon request, the facility’s existing workplace chemical list within ten working days of the date of receipt of a written request. *Id.* §§ 505.007(b), 506.007(b).<sup>2</sup> Violations of chapter 505, chapter 506, or chapter 507 may be reported to DSHS for investigation and possible administrative penalty. *Id.* §§ 505.010, 506.010, 507.009.

Section 552.101 of the Government Code excepts from public disclosure “information considered to be confidential by law, either constitutional, statutory, or by judicial decision.” Gov’t Code § 552.101. This exception encompasses information that is made confidential by other statutes. You raise section 552.101 in conjunction with section 418.178 of the Government Code. Sections 418.176 through 418.182 of the Government Code were added to chapter 418 as part of the Homeland Security Act (“HSA”). These provisions make certain information related to terrorism confidential. Section 418.178 provides:

(a) In this section, “explosive weapon” has the meaning assigned by Section 46.01, Penal Code.

(b) Information is confidential if it is information collected, assembled, or maintained by or for a governmental entity and:

(1) is more than likely to assist in the construction or assembly of an explosive weapon or a chemical, biological, radiological, or nuclear weapon of mass destruction; or

(2) indicates the specific location of:

(A) a chemical, biological agent, toxin, or radioactive material that is more than likely to be used in the construction or assembly of such a weapon; or

(B) unpublished information relating to a potential vaccine or to a device that detects biological agents or toxins.

---

<sup>2</sup>Chapter 507 of the Health and Safety Code, which applies to non-manufacturing facilities, does not contain a direct access provision.

*Id.* § 418.178. The fact that information may be related to biological toxins does not make such information *per se* confidential under the HSA. See Open Records Decision No. 649 at 3 (1996) (language of confidentiality provision controls scope of its protection). Furthermore, the mere recitation by a governmental body of a statute's key terms is not sufficient to demonstrate the applicability of a claimed provision. As with any exception to disclosure, a governmental body asserting one of the confidentiality provisions of the HSA must adequately explain how the responsive records fall within the scope of the claimed provision. See Gov't Code § 552.301(e)(1)(A) (governmental body must explain how claimed exception to disclosure applies).

You argue the submitted information is confidential under section 418.178(b) because it reveals information regarding facilities that store hazardous chemicals that are more than likely to assist in the construction or assembly of an explosive weapon. You state that a terrorist or other criminal element could exploit the requested information in planning mass attacks, in order to incite panic and enhance the likelihood of death among emergency responders and members of the public. You further state that public release of this information would significantly impact the department's ability to deliver public safety services to citizens in the event of an act of terrorism or related criminal activity. We recognize the public's legitimate interest in obtaining information concerning hazardous substances stored in Texas communities. However, we must follow the plain language of section 418.178 which, through its unconditional mandate of confidentiality, does not allow us to take into account the public interest that exists in the release of this information. Therefore, the department must withhold the information which would indicate the specific locations of the facilities at issue, which we have marked, under section 552.101 of the Government Code in conjunction with section 418.178 of the Government Code. However, as stated above, this ruling does not impact the legal right of citizens to access this information directly from any facility covered under chapter 505 or chapter 506 of the Health and Safety Code.

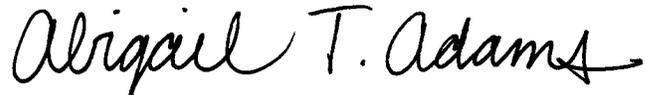

The remaining information does not indicate the specific locations of chemicals that are more than likely to assist in the construction or assembly of an explosive weapon. Further, you have not explained how section 418.178(b)(1) or section 418.178(b)(2)(B) encompasses any of the remaining information. As no further exceptions to disclosure have been raised, the department must release the remaining information.

This letter ruling is limited to the particular information at issue in this request and limited to the facts as presented to us; therefore, this ruling must not be relied upon as a previous determination regarding any other information or any other circumstances.

This ruling triggers important deadlines regarding the rights and responsibilities of the governmental body and of the requestor. For more information concerning those rights and responsibilities, please visit our website at [http://www.texasattorneygeneral.gov/open/orl\\_ruling\\_info.shtml](http://www.texasattorneygeneral.gov/open/orl_ruling_info.shtml), or call the Office of the Attorney General's Open Government Hotline, toll free, at (877) 673-6839. Questions concerning the allowable charges for

providing public information under the Act may be directed to the Office of the Attorney General, toll free, at (888) 672-6787.

Sincerely,

A handwritten signature in black ink that reads "Abigail T. Adams". The signature is written in a cursive style with a long horizontal stroke at the end.

Abigail T. Adams
